**Small, compact –
and still versatile**

grinding with passion

COFFEE GRINDER 804

Whether they are in service in small coffee stores or in a large laboratory for cupping, the series 804 models are valued for their impressive functionality and reliability. Since these machines are extremely easy to clean, they are increasingly used where coffee beans of different flavours have to be ground as this requires more frequent and thorough cleaning.

- Specially developed motors allowing large grinding capacity at all degrees of fineness.
- Preservation of coffee's unique aromatic oils thanks to uniform, gentle and cool grinding made possible by specially sharpened discs developed by ditting.
- Continuously variable adjustment of grinding fineness.
- Minimal coffee particles left in discharge tube thanks to manual taper.
- Efficient bag shaking device (KR model) distributes grounds evenly into bag and ensures all particles are dispensed.
- Precision grinding discs made of high-quality material that is extremely wear-resistant. The original discs can be used 2-3 times after re-sharpening.
- Easy to maintain and clean.

Technical data

Voltage/frequency	110-120V / 60Hz / 1*
Motor power	0.65kW
Average grinding capacity	1lb/min.**
Hopper capacity	1.1lbs
Grinding discs ø	80mm
Net weight	50lbs
Dimensions (WxDxH)	9.5" x11" x25"
Standard colour	black
UL, NSF, ETL according to NSF-8 standards	

* Other electrical specifications are available upon request

** These figures may vary according to the method of roasting and type of coffee beans

Equipment
